

Permastar Chrome Care

Clean with mild soap

Keep your wheels clean using a mild soap and water with a soft cloth as you would on your cars surface. That's all you need to keep you wheels looking great.

Use high-quality scratch remover

If a minor scratch should occur, use a high-quality "clear coat safe" scratch remover

Protect using wax

Additionally, you may protect the clear finish by applying a good "clear coat safe" wax to the surface upon receipt to protect it from scratching or damage.

IMPORTANT

Do NOT use traditional chrome cleaner or highly acidic chrome or wheel cleaner on Permastar chrome. It will degrade the surface.
